

Problem with MyStatLab link on D2L

If you click on the “Open MyLab & Mastering” and nothing seems to happen, the problem is likely popup blocking in your browser.

- In Chrome if popup blocking is enabled, which it is by default, when a site tries to open a popup page a small icon will appear in the address bar.

- Click on the icon in the address bar to allow popups from this site.

- The process should be similar in other browsers.
